

PEPPY & LILI'S SAFARI IN A HURRY

CENTRAL CATCHMENT NATURE RESERVE, SINGAPORE

Oh Pep, I hope we get to meet some of the local animals today!

Totally! But don't forget we have a mission to complete.

Howdy! What a wonderful surprise to bump into you during the daytime!

Hey there little buddy!

I should be sleeping!

Drumroll! The solitary and nocturnal...

MALAYAN COLUGO

Galeopterus variegatus

Also known as the Malayan flying lemur, they are, in fact, NOT lemurs...

You're a long way from home, cuz.

and they can't technically fly, but they sure can GLIDE !! Wowza!

Parkour!

They can glide across 100 metres
(roughly the length of 8 city buses)

11.9m

Yikes! The forest floor is full of hungry predators!

Live. Love. Eat.
Don't get eaten.

Colugos are pretty much helpless on the ground. They know better than to come all the way down here...

Or make a quick exit if they ever land on the ground.

A little snack will help me un-wind

Lower Peirce Reservoir Park
