| Goals & Aspirations | To explore and discover new worlds |

Reporting Officer's Comments

Lili is a very inquisitive cadet and enjoys a good challenge. She is brave and has a determined spirit. Her passion for the natural sciences is second only to her love for art. I'm proud to say that she has become a big contributor to our scientific understanding of planet Earth and its natural world.

Lili is an enthusiastic and friendly cadet. She is well liked by members of the crew and has the natural disposition of a leader. She is also fiercely protective of her little brother, Peppy. They have been inseparable since they were hatchlings.
