Favourite drink	Likes them all
Goals & Aspirations	To write the Galaxy's best cook book.

Reporting Officer's Comments

Chef il28 was a decommissioned 3D printer bot that we salvaged from an old ship during the Octopian Sea Skirmish. Tinkerton managed to revive him by repairing and modifying his metal body. She also rewrote Chef's original programme and reconfigured it for 3D food printing.

Chef il28 is regularly updating his library of food and beverage recipes. He has a passion for learning the culinary culture of the locals in the different planets we visit.
